

(3 Hours)

Total Marks: 80

- 1) Q.1 is compulsory
- 2) Attempt any **three** from remaining **five** questions

Q1) Solve **any four** of the following:

- a) Describe different types of environment of AI agents [5]
- b) What do you mean by Total Turing test. Explain. [5]
- c) Explain Utility based Agent with a block diagram [5]
- d) Formulate the 8 puzzle problem [5]
- e) Describe the characteristics of a part picking robot using the PEAS properties [5]

- Q2) a) What do you understand by Min Max Search and alpha beta search? Explain in detail with example. [10]
- b) What do you understand by A* search? Is it informed or uninformed search – Justify. [10]

- Q3) a) Explain steps involved in converting propositional logic statement into CNF with suitable example [10]
- b) What do you understand by forward chaining and backward chaining. Explain in detail [10]

- Q4) a) Explain various methods of knowledge representation. [10]
- b) What are local search algorithms? Explain any one in detail. [10]

- Q5) a) What is planning in AI? Discuss partial order planning and hierarchical planning in detail [10]
- b) What do you understand by Reinforcement learning. Explain in detail. [10]

Q6) Write short notes on **any two** of the following: [20]

- a) Wumpus World Environment
 - b) Applications of AI
 - c) Natural Language Processing
-
