## **ABSTRACT**

- ❖ One of the key fundamentals of building a society is common interest or shared aims of the group members. This MINI Project work is to make a web-based oriented services towards donation collection for various social needs also it gives Information about the receiver and the donor for this virtuous cause.
- ❖ The entire project has been developed keeping in view of the collect donation through computing technology, in mind. The “Giving Hands” Donation website creates an e Information about the donor and the organization that are related to donating the money towards a positive cause. Through this website any person who is interested in donating the can register himself/herself. In the same way if any Organization wants to register itself with this site they can also register. If any general consumer wants to solicit assistance online, he/she can also gain AID through site.
- ❖ Admin is the main authority who can do addition, deletion, and modification if required.
- ❖ With your underpinning(support), countless Girls will receive health care ,Education and a happy life.

# 1. INTRODUCTION

## 1.1 INTRODUCTION :

- ❖ The purpose of this project is to create a online charitable website.
- ❖ A website that helps the impoverished/underprivileged by giving them financial funding . As a website, it helps to raise funds and donations from individuals and provide resources to the women who are deprived of education and who are not given much health care.
- ❖ In times like covid Charity websites play a critical role in raising money online. Our charitable website makes it possible for people to donate any amount of money through specific online payment options.
- ❖ We will try and be connected to the social trends that would make our charity website look more approachable and well designed.
- ❖ Also, we will use color pattern and images to design the website.

## 1.2 MOTIVATION:

The motivation behind developing an online charity website is that it will entirely focus on empowerment of underprivileged women and girls those are deprived of primary education and health care services by collecting donations around the country which will help them to build their life .

Also, by developing a website the team members will get an opportunity to learn different software's and database which will expand their knowledge in programming .

### **1.3 PROBLEM STATEMENT AND OBJECTIVE:**

#### **PROBLEM STATEMENT :**

Many existing charity websites does not specify the main goals and objectives of the website. They do not provide vital information like where the charity uses the donor's money. Also , sometimes the complexity of the website makes it difficult for the user to donate.

#### **OBJECTIVE:**

- ❖ The main objective of our project is to provide financial aid to the women who are deprived of basic education and amenities by creating a user-friendly donation website using latest GUI development technology.
- ❖ Create a user – friendly and easily accessible website to attract visitors who may offer large-scale funding or long-term partnerships.
- ❖ The main motive is to collect donations around the country which will help them to build their own life .

## **2. LITERATURE SURVEY**

### **2.1 SURVEY OF EXISTING SYSTEM :**

[1] The use of websites for non - profits is increasingly important in emerging and developing markets as competition for financial support and volunteers has increased as government support has been reduced due to financial uncertainty. The Internet and web technologies have played important roles in transitioning business transactions from the offline to an online environment. While nonprofits are not traditional businesses ,they can still potentially benefit from expanding their operations online. While researchers recognize the diversity of nonprofit organizations, a well -developed and maintained websites can aid inbuilding legitimacy, credibility, and trustworthiness(Long & Chiagouris, 2006; Tsygankov, 2004), which are pertinent to all nonprofits, and their subsequent ability to raise revenue or attract volunteers (Enjolras,2009). Many nonprofit organizations already use their website to increase their visibility to the community

### **2.2 LIMITATIONS OF EXISTING SYSTEMS :**

- Nearly half of the usability problems had to do with navigation that is unintuitive and hard to follow. Most of the sites have made it hard for users to find even where to donate.
- More than half of the usability problems could be chalked up to unclear content , missing information , and confusing terms.
- One of the major reasons that people are reluctant to donate on a charity website is that the donors want to give to organizations that share their ideals and values and if this information is not present on the site they refrain.

### **2.3 Mini Project Contribution :**

1 ) Nupur Bhalekar (Roll no: 13)

- Learnt the basics of HTML and CSS and developed the frontend.
- Documentation.

2 ) Anoushka Bhandary (Roll no: 14)

- Learnt the basics of HTML and CSS and developed the frontend.
- Research on different papers related to our project.

3 ) Swati Bhatt (Roll no: 16)

- Learnt the basics of HTML and CSS and developed the frontend.
- Designed the flowchart our project.

## **3.3 DETAILS OF HARDWARE AND SOFTWARE:**

### **Software :**

Operating system : 64-bit Windows 10

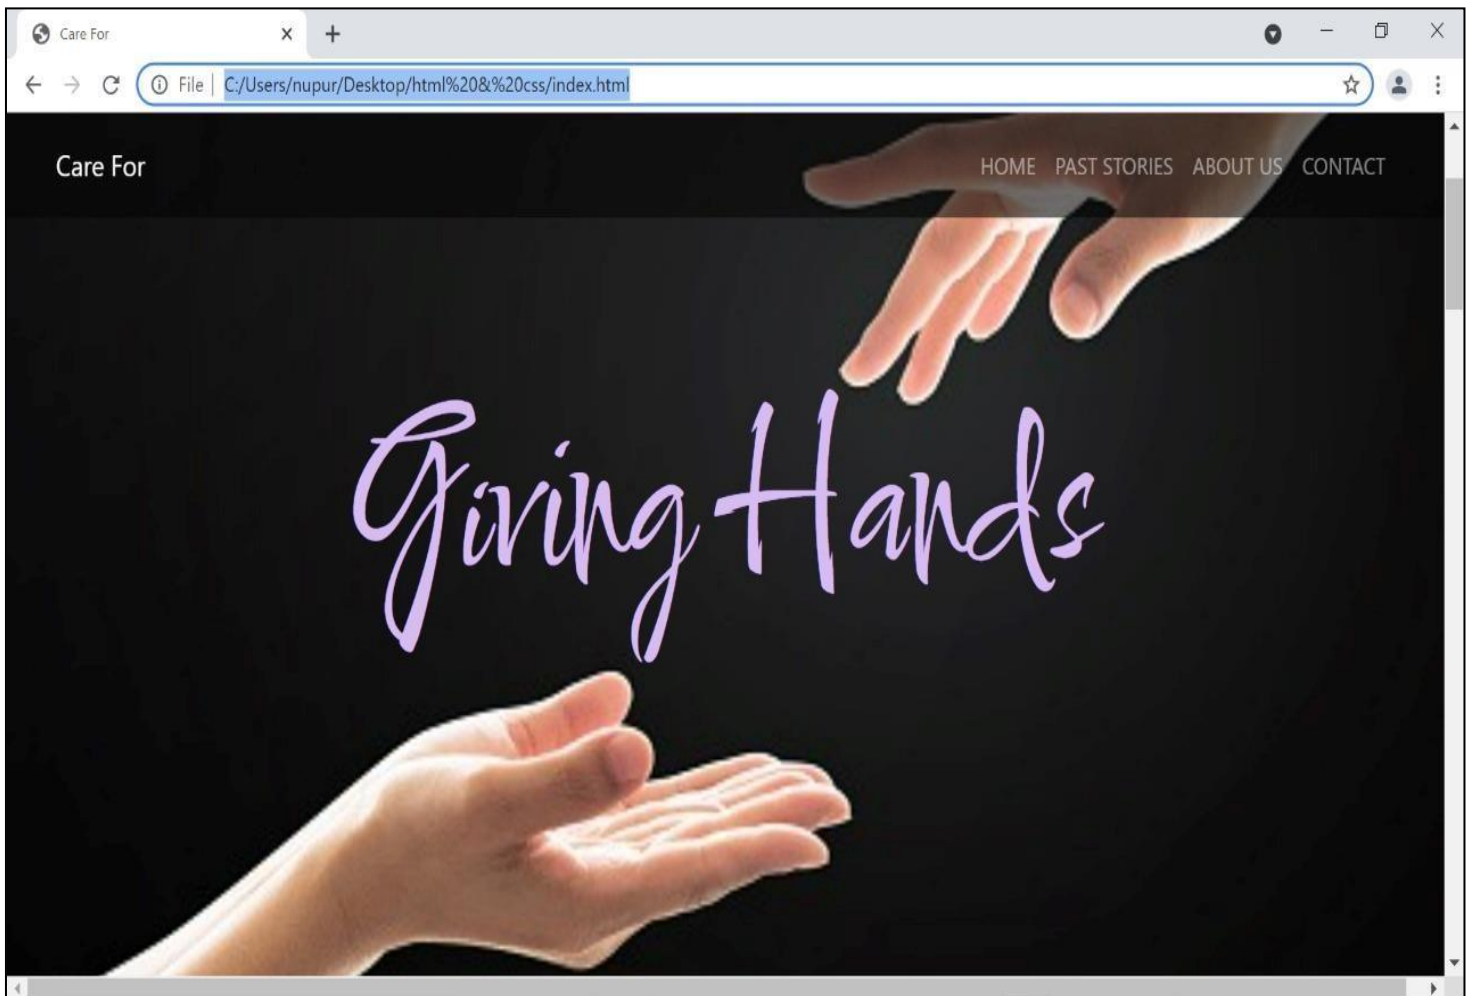

Languages : HTML and CSS

IDE : Visual Studio Code

### **Hardware :**

Processor : 11th Gen Intel(R) Core(TM) i5

Memory (RAM) : 8 GB

### **3.5 CONCLUSION AND FUTURE WORK :**

This project contains the complete design of the charity website or we can say the frontend of the website , in which we have included charity information , past experiences block , registration details and contact details. It is a user-friendly website created using latest technologies.

Our future work includes the addition of data management system which will take input from the user to make payment and donate.
