Date : 3rd January 2023.

Class: ELEC

Time: 3.00-4.00

Faculty Involved : Deepika Panchal

Activity conducted : Newspaper Reading (Vocabulary Building)

The newspaper is used to enhance skills in reading, writing, listening, speaking, math, social studies and science. Critical thinking is the natural outgrowth of using a newspaper to learn. Unlike textbooks, which are several years outdated by the time they get into students' hands, the newspaper comes alive with information. The newspaper expands the curriculum with an unlimited amount of information to use as background for learning activities.

These activities helped students improve their skills in reading and writing. These skills are among the ones they will practice: how to find the main idea, how to increase vocabulary, how to compare readings, how to form sentences, how to ask a good question and how to write a great summary.

The students were asked to read the newspaper for 15 minutes and they had to tell the class what new knowledge they gained from it.

In all 30 students attended the activity.
